What is The HOG (Hamlet Organic Garden) Farm?

We are a 12 acre farm in our 22nd year of operation, in Brookhaven Hamlet on the south shore of Long Island. We provide the community with over 300 varieties of our own vegetables, herbs, flowers, and a few fruits through our Community Supported Agriculture (CSA) program, on-site weekend farm stands, and a growing number of fine local restaurants. Our mission is to grow the most delicious and nutritious produce possible, strengthening our natural environment, empowering our farm workers, and enriching our community. We use all natural, certified organic soil amendments, animal feeds, and no chemical fertilizers or pesticides.

How can I get involved?

Visit our website to join our mailing list, read the Member Handbook, and find more information.

Fruit Share pickups begin in mid June and continue until the end of October. Fruit Shares will be picked up at the same place and time as your CSA share.

Flying Pig Fund Please consider making a donation to this fund which allows us to provide scholarships toward CSA shares for members of the community who might not otherwise be able to afford them. If you would like to apply for a scholarship, e-mail us at thehogfarmllc@gmail.com

The HOG Farm 2017 Membership Application

"I commit to Membership in the HOG Farm for the 2017 season, and understand the rules and responsibilities outlined in the HOG Member Handbook.

I understand that as a member I am joining with the farmers in both the risks (crop failure, disease, bad weather, weeds) and benefits (bountiful crops, recipes, variety, direct relationship with the farmer, and access to u-pick items) associated with farming. I understand that my share will vary from week to week, and that there is no guarantee of the amounts or content of my share.

I commit to supporting the farm through timely payments, clear communication with the farmers, and enjoyment of the fresh produce I receive. I understand that any week I don't pick up my share, my food will be donated to a local pantry when possible, or will be returned to the earth to compost itself."
